Calf Scours – The Four P's Seminar

Dr. Alex Grinberg, DVM, DipVetEpid, PhD
Senior Lecturer in Microbiology
Massey University, IVABS

Calf scours (CF) is an animal health problem caused by several infectious and non-infectious factors. These factors have been well described overseas, but little is known about the situation in New Zealand. Dr. Grinberg will provide us with hands-on interventions aimed at reducing the burden of this condition on farm to help us minimise this challenge at the start of the season.

Wednesday 25th June 2014

11am – 1pm

Te Kawai RFC, Rongotea

RSVP to info@allfarmnz.co.nz or call 06 355 0336 to confirm.
